Valuation Approaches in Germany to Determine Market Value

Thore Simon, Prof. Dr. Matthias Wepler updated by Dr.
Dieter Bärwald, Wolf-Dieter Haase, Dirk Kalthoff and Serge
Schlitz

This paper is an extract from the German version "Determining Market Value"
containing only topics relevant to the Mortgage Lending Value training course.

Date: February 2020

Table of Contents

List of Abbreviations	6
1 Definition, Application and Legal Framework of Property Valuations	10
1.1 Significance and fields of application of valuation practice	10
1.2 Concepts of value	12
1.2.1 Market value (<i>Verkehrswert/Marktwert</i>)	13
1.2.2 Mortgage lending value (<i>Beleihungswert</i>)	15
1.2.3 Insurable value (<i>Versicherungswert</i>)	16
1.2.4 Other concepts of value	17
1.3 Legal principles of market value (<i>Verkehrswert/Marktwert</i>)	17
1.3.1 Legal structure and status of domestic and international valuation	17
1.3.2 German Building Code (BauGB), Property Valuation Ordinance (ImmoWertV), Valuation Regulations (WertV), Valuation Guidelines (WertR) and other regulations	18
1.4 Components of market value	22
1.4.1 Valuation and quality reference date	22
1.4.2 Ordinary transaction	23
1.4.3 Legal circumstances	23
1.4.4 Factual characteristics and general condition	24
1.4.5 Location of the property	25
1.5 Land valuation boards	26
1.6 Selection of valuation approach	27
1.7 Chapter 1 activities	29
2 Comparison Approach	32
2.1 Significance	32
2.2 The structure of the comparison approach	33
2.3 Requirements which must be met by comparables	34
2.3.1 Quantitative representativeness	35
2.3.2 Qualitative representativeness	36
2.3.3 Deviations from circumstances affecting value	36
2.3.3.1 Conversion coefficients	36
2.3.3.2 Temporal adjustments using indexseries	41
2.4 Determining the value of undeveloped land	43
2.4.1 Determining the value of undeveloped land using comparative prices	43
2.4.2 Determining the value of undeveloped land using guideline land values (<i>Bodenrichtwerte</i>)	44

2.5	Determining the value of developed land	48
2.5.1	Determining the value of developed land using comparative prices	48
2.5.2	Determining the value of developed land using comparable factors pursuant to ImmoWertV §13	49
2.6	Determining market value	54
2.7	Chapter 2 activities	55
3	Cost Approach	57
3.1	Structure of the cost approach	57
3.2	Quantitative components: area or volume dimensions	59
3.3	The components of value: costs of constructing buildings and other improvements	61
3.3.1	Costs of constructing buildings	61
3.3.1.1	Quality standards	63
3.3.1.2	Indexation	63
3.3.2	Costs of constructing special operating facilities	65
3.3.3	Cost of constructing outdoor installations	65
3.3.4	Incidental building costs	66
3.4	Age-related depreciation	68
3.4.1	Total useful life	68
3.4.2	Remaining useful lifespan	69
3.4.3	Prolonging the remaining useful life	71
3.4.4	Shortening the remaining useful life	74
3.4.5	Calculating age-related depreciation	76
3.5	General market adjustment (ImmoWertV §8 (2), point 1)	78
3.6	Treatment of special property-specific characteristics (ImmoWertV §8 (2), point 2)	81
3.6.1	Reductions in value due to building defects and structural damage	81
3.6.2	Other special property-specific characteristics	84
3.7	Determining market value	85
3.8	Chapter 3 activities	87
4	Income Approach	90
4.1	Fields of application for the income approach	90
4.2	Duality of land and building value	91
4.3	Versions of the income approach	92
4.4	General income approach	93
4.4.1	Gross income	95
4.4.2	Operating expenses	98
4.4.2.1	Management costs	99
4.4.2.2	Maintenance costs	100
4.4.2.3	Allowance for the risk of rental loss	103
4.4.2.4	Service charges	104
4.4.3	Net income	107

4.4.4	Annual return on land value	107
4.4.5	Net income share of the building	108
4.4.6	Capitalisation rate	108
4.4.6.1	Determinants of the capitalisation rate	110
4.4.6.2	Determining the capitalisation rate	112
4.4.7	Remaining useful life	113
4.4.8	Net present value factor for capitalisation	113
4.4.9	Income value and general market adjustment	115
4.4.10	Treatment of special property-specific characteristics	115
4.4.11	Determining market value	117
4.5	Simplified income approach pursuant to ImmoWertV and EW-RL	117
4.6	Income value based on periodically fluctuating income	118
4.7	Chapter 4 activities	120
5	Solutions to the Activities	123
	Table of Figures	125
